The Project Management Professional (PMP)® credential of the Project Management Institute (PMI)® is probably the most important industry-recognized certification for project managers. Globally recognized and demanded, the PMP® demonstrates that you have the experience, education and competency to lead and direct projects.

This recognition is seen through increased marketability to employers and higher salary; according to the PMI Project Management Salary Survey–Seventh Edition, certification positively impacts project manager salaries.

This course prepares you to take the examination for either or both of the following certifications:
- Certified Associate in Project Management (CAPM)®
- Project Management Professional (PMP)®

In an increasingly projectized world, professional certification ensures that project managers are ready to meet the demands of projects across the globe. CAPM and PMP get your career on the right path or take it to the next level.

The PMP recognizes demonstrated competence in leading and directing project teams. If you’re an experienced project manager looking to solidify your skills, stand out to employers and maximize your earning potential, the PMP credential is the right choice for you.

The CAPM is an introductory level certification, targeted to those that do not have the professional experience required to take the PMP examination.

For the PMP: with a secondary degree, at least 36 months with 4,500 hours of leading and directing projects.

For the CAPM: no previous professional experience is needed.

May 12, 13, 14, 15, 16 2014

5 days

45 teaching hours

Course Led by Yiannis Vithynos PMP, PMI-ACP, PRINCE2, IPMA-D, MCTS, Critical Path
